

- Claim 31 (new): The system of claim 1 wherein the base station is also connected to the public switched telephone network (PSTN).
- Claim 32 (new): The system of claim 1 wherein the base station is connected to the Internet and has an IP address.
- Claim 33 (new): The system of claim 1 wherein the base station has means to create two way communications between the user and a remote user.

### REMARKS

The present amendment addresses all the Examiner's objections included in the examiner's Office Action dated August 9, 2004.

In addition, the applicant reviewed the following patents to verify that the new set of Claims avoid all and each of these references:

Patent Number: 5,930,728 Evanyk  
Patent Number: 5,737,703 Byrne  
Patent Number: 5,818,820 Anderson  
Patent Number: 5,884,270 Walker  
Patent Number: 5,862,223 Walker  
Patent Number: 5,745,556 Ronen  
Patent Number: 5,845,267 Ronen  
Patent Number: 5,386,369 Christiano  
Patent Number: 6,295,482 Tognazzini  
Patent Number: 6,205,436 Ronen

Therefore, for clarity, all previous Claims were deleted without prejudice and new set of Claims were drafted to avoid all Examiners' objections and all above cited references and prior art.

In the present invention we disclose a system and method that allow users to communicate between them via the Internet while using land line and or cellular hand held devices. To facilitate such communication we introduced new base stations that communicate with the hand held devices in a short range of a few 10<sup>th</sup> of meters, and a computerized center that provide to the users the IP address of the addressee user.

In order to illustrate and clarify the scope of the current invention by means of an example, a user having a cordless telephone can go to any location in the world where a new base station is installed and place a telephone call via the Internet while using his home telephone number. This as extending the range of cordless telephone to infinity, provided we use the system and method described in this invention.

In the previous art no such disclosure was made.

Therefore, it appears that new Claim 20 defines a novel method and system for wireless and or cellular and or cordless telephones communication.

It is submitted, therefore, that new Claim 20 is clearly allowable.

The new Claims 21 to 33 are all dependent on new Claim 20 and should be allowed.

**Petition and fee for extension of time:**

Applicant respectfully asks to be granted an extension of time for this response being within 3 month.

A Petition for Extention of Time under 37 CFR 1.136(a) is attached.

Payment of the extension fee is by credit card, please find attached the US PTO Credit Card Payment Form, filled in the amount of \$ 215 (small entity).

I hereby declare that the present document has been sent to the US PTO  
by Fedex on November 7, 2004.

In view of the foregoing, it is believed that this application is now in condition for  
allowance.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Elad Barkan". The signature is written in a cursive style with a large, stylized "B".

Elad Barkan
